May 5, 2021

We have received guidance from DHCD on how to safely open Post COVID-19 vaccinations.

The CHA Office is now open to the public, resuming normal office hours. You must continue to wear a mask and safely distance. We strongly encourage you to continue to wear face coverings in all common areas and distance whenever possible.

The Community Room will re- open on May 15 for small gatherings of 10 people or less. There may be minor disruptions as we work to repair the air conditioning in that room.

As weather permits, the CHA Maintenance will open windows in common areas to promote air exchange by bringing in outside air. Windows will be closed before CHA Maintenance Staff leaves for the day.

Annual inspections and routine work orders will resume in all developments. All CHA staff are fully vaccinated but will continue to adhere to basic public health guidance. Staff will continue to wear masks, maintain distance, and practice good hand hygiene.

As projects resume, all consultants and contractors will be required to wear masks on site at all times.

The long awaited “end of the tunnel” is upon us and with more and more getting vaccinated, it is hopeful that we can return to normal.

Please contact the office with any questions.
